89291	PGD (Fixation and Biopsy)		
89352	THAWING of Cryopreserved Embryo(s)		
	ANESTHESIA (by third party)		

Fertility treatments costs can be overwhelming. As you do your research and compare costs with different fertility centers, here are a few other questions to ask in order to get true comparisons:

- What are your success rates?
- Is Assisted Hatching included?
- Is the Post IVF Visit included?
- Are the 'pre-cycle' visits included?
- Is ICSI or Cryopreservation included?
- How many visits and lab draws are included?
- What kind of sedation is used and what is the cost?
- Is Extended Embryo Culture included (Day 3 vs Day 5)?
- What happens if you cancel your treatment and need to wait a month?
